Beccev Denis

Full-Stack Web Developer

Full-stack developer building modern web applications with **Laravel, Next.js, React, PHP, MySQL, and TypeScript**. I enjoy turning ideas into functional, well-structured products while continuously developing my technical skills through hands-on experience. I focus on clean code, quality UI/UX, and understanding what happens under the hood — from application architecture and logic to performance and maintenance. I strive to build reliable, user-friendly web solutions that genuinely solve users' needs.

• Education

Full-Stack Development

November 2024
December 2025

STEP IT, Chişinău

Holds a certificate of course completion

• Work experience
